

Solves	Variables	Closure
instantaneous N-S	u, v, w, p	none (exact)
filtered N-S	$\bar{u}, \bar{v}, \bar{w}, \bar{p}$	sub-grid scale model
mean flow + 7 PDEs	$U, V, P, \overline{u'_i u'_j}, \varepsilon$	stresses solved directly
mean flow + 2 PDEs	U, V, P, k, ε	Boussinesq EVM
mean flow + 1 PDE	U, V, P, k	Boussinesq EVM
mean-flow PDEs	U, V, P	algebraic l_m
